# Introduction

Imagination is much larger than the world we live in. But the world we live in is limited by our human body, the laws of nature, physics, and time. Limitation Free for everyone to visit and explore, Minigold MG will replace our current experiences of TV, cinema, business communications, education, entertainment, shopping, commerce services, even search, and much more

We will create and nurture a self- sustaining economy of both established and new innovative businesses, with the world future proofed, and continuing to evolve over time without dependence on its original creators. A world rich with content, activities, and opportunity

We want our customers to be able to experience their greatest life desires, with unlimited

possibilities for working, creating, discovering, gaming and trading. We will be creating a Never- Ending Motivating Economy where all creators and active customers are regularly and fairly rewarded for their work, voting, reviews, completing Quests, staking MG Tokens, and also random airdrops within the world. It is unquestionable that Virtual Reality will change our world. With timing critical, we've been waiting for the right moment when technology and adoption will allow us to be the best on the market. Thanks to the combination of several newly created technologies that make it possible.

Our aim is to introduce safe, trustworthy crypto coin to the market and participate in restoring credit to the presale cryptocurrency market, we understand how a person feel & its pain when scammed, unfortunately, some of our team member, friends, family and may you experience it, our coin is against Rug Pull. Let's return credit to the presale cryptocurrency market

## Vision

Our analysis and research into the marketplace and our competitors have provided us with significant insight into the challenges they faced and the various mistakes they have made, whether through bad timing or inappropriate choices of technology that will restrict their future

development and upgradability. We will never stand still the world will continue to evolve into the future Virtual Reality offers a revolutionary way of passing on information, advertising, presenting projects, trading, investing, communicating with people, and gaming.

MG cryptocurrency is designed to provide our customers with a safe and secure way to store and transfer their assets. We are committed to maintaining the trust and confidence of our customers by providing a safe and reliable service.

We will create and nurture a self-sustaining economy of both established and new innovative businesses, with the world future-proofed

## Analysis & Research

Unlike some of our competitors, MINIGOLD MG is a World built for the future. We have specifically designed it to be fully upgradeable, with our graphics and trade world capabilities continuing to improve in line with the latest innovations and trends in the VR, blockchain, and gaming sector.

## What is MG?

" Minigold, the revolutionary new cryptocurrency that is backed by physical gold."

"Invest in Minigold, invest in gold."

MiniGOLD MG is a World built for the future with designed specifically for virtual reality and virtual trading We have specifically designed to be fully upgradeable, with our graphics and world capabilities continuing to improve in-line with the latest innovations and trends in the VR (virtual reality) blockchain and gaming sector and its goal is to provide instant anonymous online payments and investing. Cryptocurrency has millions of active users around the world and the number of people constantly grows very fast, We create the first in the world hybrid coin/token cryptocurrency which includes 80% hybrid and 20% coin/token, is the best way to increase currency liquidity and to list tokens on exchanges get access to the maximum amount of crypto exchanges and sell their coins to investors".

Mini gold is a cryptocurrency that aims to provide a decentralized and transparent way of investing in physical gold. Mini gold tokens are backed by physical gold stored in secure vaults, and each token represents a specific amount of gold, With Mini gold, investors can purchase and trade gold-backed tokens on a blockchain platform, making it more accessible and convenient than traditional methods of investing in gold and allows investors to easily track the value of their investment and ensures that the value of the token is directly tied to the value of the underlying gold.

Another advantage of Mini gold is that it provides a way to hedge against inflation and market volatility. As gold is considered a safe haven asset, it tends to hold its value well during times of economic uncertainty. By investing in Mini gold, investors can gain exposure to the gold market and potentially protect their portfolio from market fluctuations.

Our cryptocurrency uses blockchain technology, which is considered to be one of the most secure and transparent ways of storing and transferring digital assets. The blockchain is a decentralized public ledger that records all transactions, making it virtually impossible for hackers to tamper with or manipulate the data.

We also use advanced encryption techniques to protect our customers' personal and financial information. All transactions are processed over secure channels, and sensitive information is stored on secure servers that are protected by multiple layers of security.

MG is registered in BSC (Binance Smart Chain) and listed in PancakeSwap with 27% liquidity locked

. "Mini gold is the revolutionary new cryptocurrency that is backed by physical gold.". "Each Mini bgold token represents a specific amount of gold stored in secure vaults, providing a decentralized and transparent way to invest in physical gold."

. "With Mini gold, you can easily purchase and trade gold-backed tokens on a blockchain platform, making it more accessible and convenient than traditional methods of investing in gold."

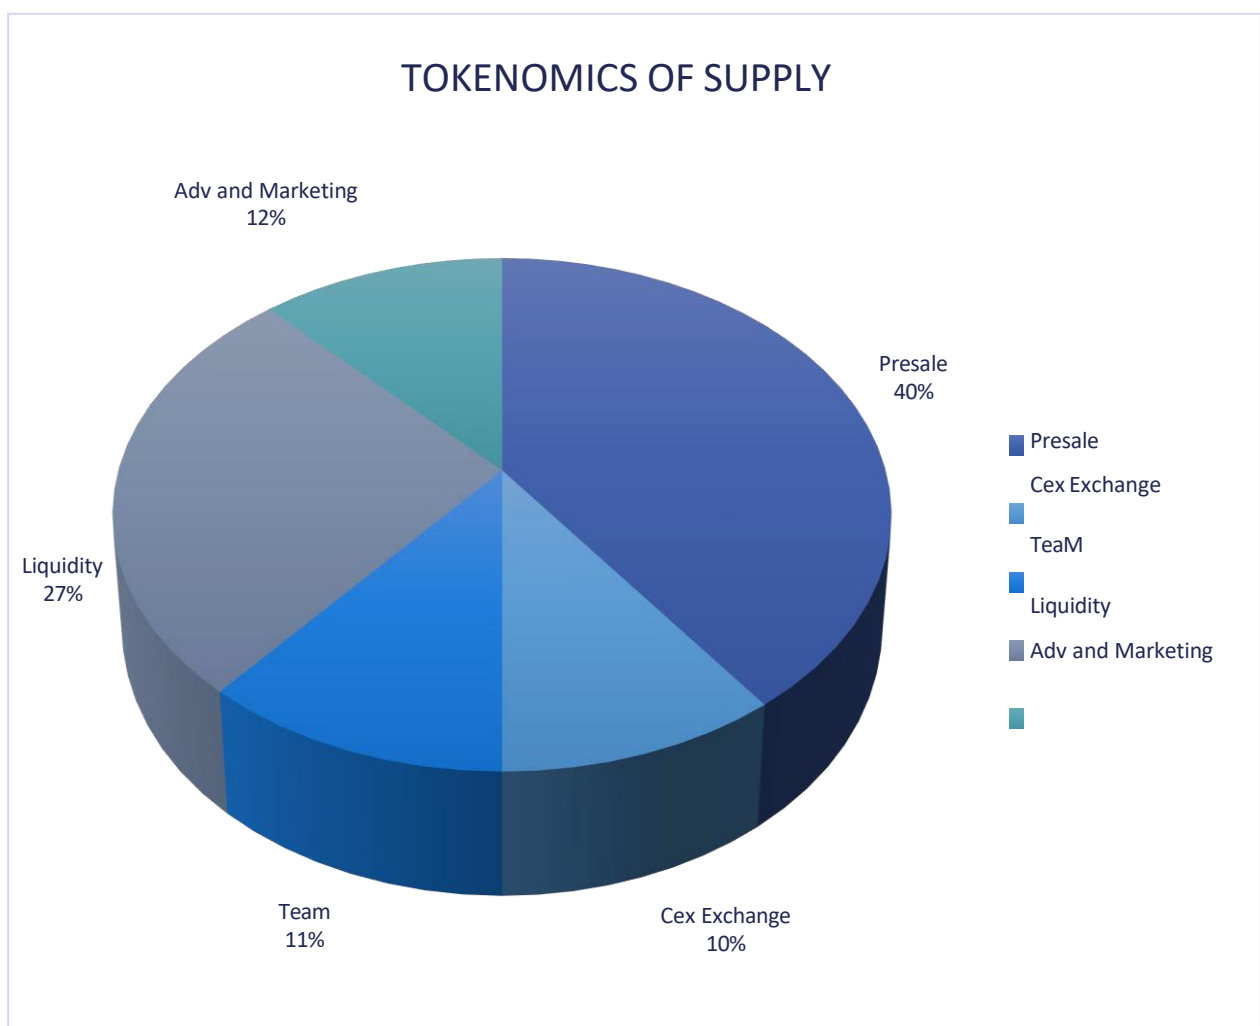

. "Mini gold also provides a way to hedge against inflation and market volatility. As gold is considered a safe haven asset, it tends to hold its value well during times of economic uncertainty."

"With Mini gold, you can easily invest in gold, buy and sell tokens on the platform, and track the value of your investment in real-time. No need for storing physical gold or worrying about security."

. "Mini gold is not only a secure investment but also a hedge against inflation and market volatility. Gold has always been considered a safe haven asset and Mini gold makes it more accessible and convenient to invest in it."

# Tokenominc

To be among the top 100 coins by creating its own ecosystem and to reach the goal of 1 billion USD.

Liquidity will be locked for 13 years, while the team token will be locked for 4 years followed by 4 years vested schedule, this makes it impossible for a rug pull to occur.

# Team

Mini gold team has a wealth of experience and a diverse set of skill that allow us to tackle any challenge that comes our way, we work well together, each team member bring unique perspective and ideas to the table, leading to innovative solutions and successful project, we are in the market since 2016, our long tenure in the market give us experience and knowledge to navigate market fluctuations, changes and to adapt to changing market trends, our team member are expert in their fields and have a deep understanding of the market dynamics, which allows us to make informed decision and adopt to changing the condition, we continuously monitor the market and adjust our project strategies according to ensure that we remain competitive and successful. Our experience in controlling market fluctuations, allow us to establish a strong and resilient project that can withstand market challenges.it will be great having you with us and ensure great experience for you to be a part of such a dedicated and talented project.

Furthermore, our team is composed of experts in the field of cybersecurity and blockchain technology, which ensures that our cryptocurrency is always up-to-date with the latest security measures.

"MG coin is designed and created with high-level security by our professional team developer measures to ensure the protection of users' assets. It uses advanced encryption techniques and multi-layer security protocols to secure transactions and prevent hacking attempts. The platform also implements frequent security audits and updates to stay ahead of potential threats. Additionally, the decentralized nature of the coin adds an extra layer of security as it eliminates the risk of a single point of failure. Overall, MG coin provides users with peace of mind knowing that their investments are secure." Team member passed KYC.

## What makes us better?

"Mg coin is designed with high-level security measures to ensure the protection of users' assets. It uses advanced encryption techniques and multi-layer security protocols to secure transactions and prevent hacking attempts. The platform also implements frequent security audits and updates to stay ahead of potential threats. Additionally, the decentralized nature of the coin adds an extra layer of security as it eliminates the risk of a single point of failure. Overall, my coin provides users with peace of mind knowing that their investments are secure."

Unrivalled Graphics NFT Revolution • Users can Create, Modify and Combine NFT's. • Creators can showcase and sell digital artwork in the NFT Gallery. • NFT's can be securely traded in The Big Market MG. Future Proofed • The MINIGOLD MG World server solution is fully upgradable and scalable

Appeals to a wide audience of business and leisure users. • Commercial Partnerships, Entertainment, New Business Models.The ultimate MG experience with realistic graphics rendered with the latest Unreal Engine. A unique dynamic special effects solution. Tokenomics – play to earn • A never-ending motivating economy that rewards active users and stackers.

The MINIGOLD MG Token (MG) will be the currency of MINIGOLD MG World. The MG Tokens are pre-mined, with the total amount predetermined. These ERC20 Tokens will be our primary source of generating revenue during the start of the project. We want MINIGOLD MG to be accessible to all, and so customers will be able to earn MINI GOLD MG by simply taking part in the world. It will be "pay-to-speed" not "pay-to- win.

# Why invest in MG project?

MINIGOLD MG will become a self-sustaining economy. Traditional businesses will establish locations for themselves in MINIGOLDMG, where they will be able to sell and promote their digital and real-world goods and services. We will enable the creation of new business models and a new breed of digital entrepreneurs.

MG Tokenomics has been designed to encourage new users to explore and experience the world, whilst motivating more seasoned users to build complete quests, and further develop our new world together. These incentives will drive the rapid adoption and growth of MINIGOLDMG. It will keep users engaged and returning. barriers for them to provide innovative goods and services to the global MINIGOLD MG community. MG Tokens will be used to buy and sell goods, from traders and creators.

The entire MINI GOLD MG Economy is mathematically designed to be very interesting for everybody while motivating experienced users to create and newcomers to play, explore and discover. As a result, the world of MINIGOLD MG will continue to grow rapidly, which in turn will be good for all the current users and the entire community. At the same time, everything is mathematically designed so that the wealth/fuel of MINIGOLD MG never runs out and the rewards and motivation for players and creators never end.

The system of the law we have determined with smart contracts will give the investors and supporters the chance to present the results of the project with its transparent, fast, and reliable structure that everyone can control. In this way, all doubts of those who support the Mini Gold Project will disappear.

## Target audience

We will be targeting a wider demographic of users and trading investors than our competitors. Our development technologies and scalable servers mean we are the first MG world to host millions of users online at one time. We will connect a rapidly growing community of crypto enthusiasts with an already very large community.

Our primary focus will be targeting users of cryptocurrencies and speculators as early adopters. These users already have a good understanding of blockchain technologies, and will be able to easily understand our vision for the world, and be early adopters, purchasing MG Tokens as they believe in the potential of the project and see it as a good investment.

Our secondary target will be the giant global gaming community that will want to become a pioneer of this new world. Mordor Intelligence expects the global video games market to exceed

\$256 billion by 2025, with projected revenue of \$1,274.4 billion in 2030

## Virtual Reality (VR)

It is unquestionable that Virtual Reality will change our world. With timing critical, we've been waiting for the right moment when technology and adoption will allow us to be the best on the market. Thanks to the combination of several newly created technologies, what we can send

into virtual glasses has not been possible in virtual reality in multiplayer so far, Virtual Reality offers a revolutionary way of passing on information, advertising, trading, presenting projects, communicating with people and game.

## Game

in-game advertising industry that we have mobilized will provide significant opportunities for both game producers and brands looking for new marketplaces, Not only brands, but also game enthusiasts will have great advantages thanks to the MG. If you own MG, you will also have the convenience of in-game payment. Game users will be able to purchase MG and increase their earnings in exchange for creative actions they will make with these ads.

MG In "Mining Gorilla," players control a small gorilla who must navigate through a series of increasingly difficult levels, breaking through rocks and collecting coins along the way. As the gorilla collects coins, it will grow in size and strength, eventually becoming a mega gorilla capable of destroying even the toughest of obstacles. The game will feature intuitive touch controls, allowing players to easily guide the gorilla through each level by swiping and tapping on the screen.

The gorilla will have a variety of moves at its disposal, including a powerful punch and a ground-shaking stomp, which can be used to break through rocks and defeat enemies. In addition to the main campaign, "Mining Gorilla" will also feature a variety of bonus levels and challenges, as well as unlockable skins and power-ups that can be used to customize the gorilla and give it even more smashing power.

Overall, "Mining Gorilla" will be a fun and challenging action game that appeals to players of all ages, with engaging gameplay and cute, colourful graphics.

(( game: At the start of the game, only basic items will be available to the user with resources having to be extracted manually. MINIGOLD MG Users will be able to use their MG Tokens to purchase a shovel, enabling them to extract resources faster. Eventually, the user will be able to

purchase machineries such as a digger or miner to extract the resources automatically, even when they are not playing in-game.

## Avatars

Created using Unreal's Metahumans, Avatars are fully customizable (over 1,000,000 possible combinations), in realistic graphics. This allows users to create virtually anyone with each avatar written as an NFT's on the blockchain Users will not be restricted to a single Avatar, and can have several characters. Special custom features (horns, wings, etc.) can be obtained by completing Quests or from competition. Some features can supply your avatar with special abilities (flying, immortality, etc.).

## NFC

### Why NFC is so important?

As the world becomes more and more digital, many objects emerge as digital only, and the solution to the ownership question is NFT's (non-fungible tokens). Currently, the NFT's market Whitepapers

is getting close to a major milestone — \$100 million NFT's sold which can be checked at NonFungible.com. According to a recent year-end report by NonFungible.com, the leading data provider for the NFT's industry, the total market capitalization of all NFT's stood at about \$210 million in 2019. By 2022, it is predicted that the NFT's market will reach \$710 million. Bitcoin started in 2009 and reached a trillion-dollar market in February 2022. NFT's are set to reach a trillion-dollar market much, much faster.

Non-fungible describes an asset that is unique. NFT's contain identifying information recorded in their smart contracts. It's this information that makes each NFT different and as such, they cannot be directly replaced by another token. They cannot be swapped like for like, as no two are alike. We use several standards of NFT's, for example: ERC721: Each NFT's is one unique item in MINIGOLDMG. This standard allows us to tokenize ownership of any arbitrary data. ERC1155: Standard used to create both fungible (currencies) and non-fungible assets (e.g. in-game items). Transactions could be bundled together – thus reducing the cost of transferring tokens. NFT REVOLUTION NFT's in MINIGOLD MG are revolutionary. We will be taking NFT's and their trading to the next level, with the ability to visualize 2D or 3D NFT's in a 3D space before purchasing. Users are able to easily create their own NFT's and will be able to collect NFT's that have a functional use beyond decorative. These are NFT's that can give the user real super powers such as flying or invisibility, or they can produce MG Tokens or even more NFT's.

MINIGOLD MG will take the trading of NFT's to the next level with The Big Market MG - creating an NFT paradise for creators, collectors and traders. A decentralized marketplace operating on smart contracts, The Big Market MG will be the largest blockchain NFT asset exchange. Users will be able to trade literally anything and everything even new items which can be directly created in The Big Market MG and which have never been offered before. Facilitating the trade of goods and services, users can create and join auctions, with items available to be tested and inspected in detail before purchase. P2P Trade Plugin When meeting people in MINIGOLD MG anything can be traded or offered to other users by shaking hands to close the deal.

We will become one of the main global marketplaces for NFT's (non-fungible tokens). Within MINIGOLDMG, users will be able to create NFT's Tokens (Art, 3D objects, customization of other objects) and securely trade both their in and out- world NFT's in the The Big Market MG.

# ROADMAP

Following a successful Token Pre-sale, we will launched our MG Gallery Experience on schedule and are on track to fully launch MINIGOLD MG in Q2 2023 MINIGOLD MG Within the next 3 years, we will successfully launched MINIGOLD We will be well established in the crypto and gaming industry with multiple commercial partnerships having established a presence and operating in MINIGOLD MG . There will be well known brands with established locations across the world. Within 5 years, MINIGOLD MG will be a fully self-sustaining economy with people spending more time in MINIGOLD MG than in the physical world.

## How to invest
